

Shakeena Akbar

Senior Test Engineer

Phone +91- 7010807783 / E-mail shakeenakbar28@gmail.com

Professional Summary

Senior QA Engineer with 5 years of experience in Manual and Automation Testing across Logistics, Retail, IT Service Management, and Sales domains. Strong expertise in Functional, Regression, and API Testing with hands-on experience in Selenium WebDriver using Java. Experienced in modernization, migration, and automation transition projects in Agile environments. Proven ability to reduce manual regression effort through automation and backend validation using SQL.

Technical Summary

Automation Testing: Selenium WebDriver, Java, TestNG, Maven, Page Object Model (POM)

API & Backend Testing: Postman, REST API Validation, SQL Queries, DB2, MS SQL Server

Manual Testing: Functional, Regression, Smoke, Sanity, Integration, System Testing, UAT

Tools: JIRA, Confluence, Jenkins, Bugzilla

Methodologies: Scaled Agile, Agile (Scrum), SDLC, STLC

Domains: Logistics, IT Service Management, Retail, Sales & Marketing

Professional Experience

QA – Test Engineer | SrinSoft Technologies | Jan 2021 – Present

Project Summary

Logistics Domain – Shapiro 360 & Claims Automation

Technologies: AS400, DB2, MS SQL, PEGA, REST API

- Analyzed business requirements and prepared detailed test cases
- Performed Functional, Integration, System, and Regression Testing
- Validated freight claim workflows and compensation logic
- Conducted backend database validation using SQL queries
- Performed REST API validation using Postman
- Managed defect lifecycle using JIRA and participated in triage meetings
- Supported UAT cycles and release validation.

IT Service Management Domain – HelpDeX

- Performed end-to-end functional testing of ticket lifecycle workflows
- Designed test cases for incident management, escalation, and SLA validation
- Executed regression and smoke testing cycles
- Verified backend data consistency using SQL
- Prepared test summary and status reports

Retail Domain – WinCo Foods (Phase 1 & 2)

Technologies: AS400, MS SQL Server, .NET Core

- Prepared migration validation test cases from legacy to new system
- Performed data validation between AS400 and MS SQL
- Executed backend validation using SQL queries
- Logged and tracked defects in JIRA
- Supported UAT and deployment verification

Sales & Marketing Domain – Customer Portal (Manual to Automation Transition)

- Designed and executed functional and regression test cases
- Identified repetitive scenarios and automated using Selenium WebDriver with Java
- Implemented Page Object Model (POM) with TestNG framework
- Built regression suite and executed via Maven
- Integrated automation execution with Jenkins
- Reduced manual regression effort by automating critical workflows
